

LSK
Green Group

LSK Green Group a.s.

With over 20 years of experience in energy consumption management, our team of experts is dedicated to delivering personalized energy solutions that meet the unique needs of our clients.

As a pioneering broker in community power sources, we are committed to sourcing renewable energy from our own and other sources.

At our core, we believe that by working together, we can build a more sustainable future.

MITREX AND LSK GREEN
GROUP SOLAR PRODUCTS

UNLIMITED OPTIONS OF MATERIALS

We offer an endless variety of active and non-active materials, colors, textures, and finishes of cladding facing, suitable for any application.

REALIZATION OF SOLAR GLASSES

CERTIFICATION OF BUILDINGS ACCORDING TO THE LEED STANDARD

Our solutions can meaningfully contribute to new builds and retrofits
gaining top LEED designations.

Our cladding system allows buildings to have outstanding energy
efficiency.

FVE VITESCO

PPA (Power Purchase Agreement) — green energy from your roof without investment

LSK Green Group's PPA provides a long-term supply of electricity from a renewable energy source. Our customers can use clean energy without worrying about fluctuations in electricity prices because we guarantee the price of electricity throughout the duration of the contract.

Ensuring a Stable
Supply of Energy

EV-CHARGERS ADS-TEC Energy

Self-consumption optimization or peak shaving? Stand- alone operation or backup power? Charging solutions or grid services? From the local farmer to the downtown shopping mall to the large corporation — we offer numerous different applications for a variety of sectors.

High Charging Power
(Up To 320 Kw)

Charging from
renewable sources

Simple Installation
and Commissioning

No Grid
Expansion Required for
Operation

Battery-Based

All-In-One
solution

ENERGY STORAGE SYSTEMS

StoraXe® battery modules from ADS-TEC can be adapted and scaled to many individual requirements. Depending on voltage, power and capacity requirements, the modules are grouped together to form a powerful battery system.

Constantly High Power

Optimisation of personal consumption

More self-sufficiency

Grid Services

Safety and quality

SVR TECHNOLOGY

A power reserve and balance system is a mechanism within electricity networks that ensures that the supply and demand for electricity are in balance at all times, and that in the event of unexpected events such as sudden increases in demand or power plant outages, sufficient reserve power will be available. Overall, it is a critical element of modern energy networks, ensuring that the power grid is able to respond quickly to changes and maintain reliable power supplies even in unexpected conditions.

Its task is to ensure that there is a balance in the network and between production and consumption. As a result of the use of renewable resources in particular, there are frequent fluctuations in the network, and these fluctuations need to be regulated precisely through support services.

WIND ENERGY SYSTEMS

LSK Green Group offers a reliable and efficient solution for producing clean and sustainable energy through the use of wind turbines. Our cutting-edge systems are engineered for optimal performance and ease of installation, ensuring a seamless experience.

OUR TEAM OF EXPERTS

Each member of our team possesses vast knowledge and expertise, allowing us to offer innovative solutions that are customized to meet our clients' specific requirements.
